

Invent

Aviation Training, Reimagined

OVERVIEW

CPaT Invent is a first-of-a-kind software platform that empowers the trainer like never before. Take your training to the next level with this authoring tool that allows the trainer to create their own content, edit in real-time, and even modify CPaT course content to match your requirements.

With access to a robust aviation asset library, the ability to translate and narrate in more than 100+ languages, and more, enhance your training program with CPaT Invent.

KEY FEATURES

- Create, modify, or maintain CPaT courseware or your courseware
- Improve safety by enabling specialized training
- Reinforce important training concepts by uploading reference material, images, videos, and illustrations
- Elevate trainings with CPaT's library of aviation training imagery and assets
- Translate training content into 100+ languages, including text to speech narration
- Pre-set course structure and slide templates
- Simple drag & drop slide sorting
- Demonstration, Practice and Perform/Test Mode
- Maintain version control
